Roller Shutter Manufacture and Installation

## Armourshield Roller Shutters That Travel Around The World

We have worked on some amazing projects over the years but this contract is going to take some beating. Because, lets face it, not everyone gets excited about shutters. But unfortunately it's an occupational hazard here at HVP. However, roller shutters don't have to be drab or dreary and We're doing our best to give them a better reputation.

Over the last five years we have had the contract for the roller shutters on all the 5 star cruise ships Mein Schiff.

Roller Shutter Manufacture and Installation

## Armourshield Roller Shutters That Travel Around The World

For the 'Mein Schiff' series cruise ships, we supplied two types of shutters: the Facade transparente polycarbonate shutter, and the Armourshield Grille, which offers tough security with good visibility and airflow

The ships are completely refurbished every 5 years, so at that time the shutters are changed as well. We work together with the shipyard and create drawings to the specifications they supply.

In addition to the normal safety features such as safety brakes, the shutters also receive extra support at install time. Also see the anatomy of a roller shutter.

Our shutters are used in the on-board shopping centre to close off the shops outside of opening hours.

The Armourshield's design gives lots of open space and airflow, which creates the right ambiance for the ships' shopping arcades.
